MOUNTING THIRD BRAKE LIGHT

These brackets are powder coated; stainless steel hardware included.

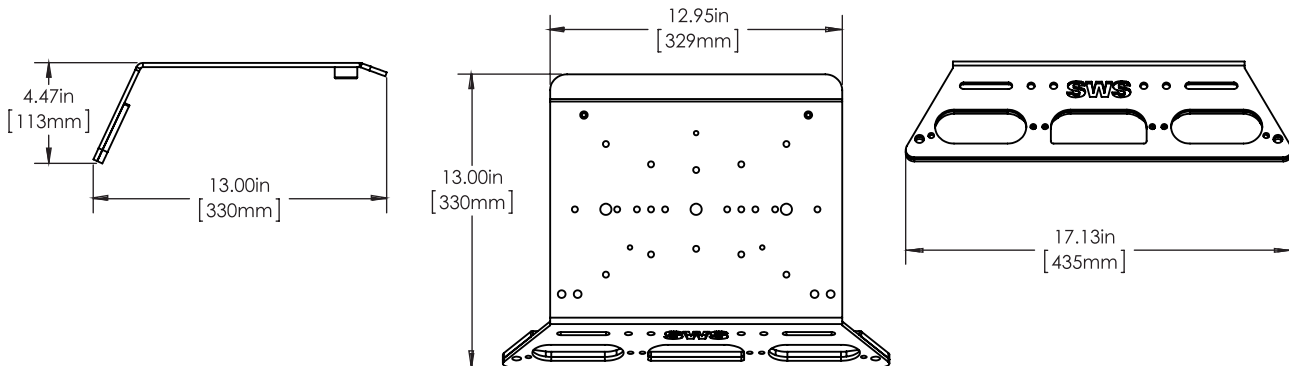

98088FB

98088FW

Features:

- Fits Ford F-150, F-250, and F-350 2016 to 2026 aluminum body trucks with LED or Halogen brake lights
- Prevents the need to drill holes into the vehicle or racking
- 3/16" aluminum plate construction
- Easy 2 bolt installation
- Contoured for aerodynamic downforce on leading edge of plate
- Application uses include: Predrilled holes for most SWS product mounting options
- Carbon steel top plate available for magnet mounting light (Product #98021)
- Can mount up to 48" traffic director to the bracket (needs kit #98000)

Recommended Accessories *Sold Separately*

LEASING QUICK KEY POINTS

- Many fleets now lease vehicles, and they must be returned in original condition.
- Drilling, hard-wiring, or permanent installs can cause penalties, rejected returns, and lower resale value.
- No-drill, plug-in, and magnetic mounting solutions allow fleets to add safety lighting without damaging the vehicle.
- Temporary equipment can be removed and transferred, while maintaining required visibility and safety.

Bottom line: Protect the lease, stay compliant, and keep crews safe, all without permanent vehicle modification.
